How to create a Project?

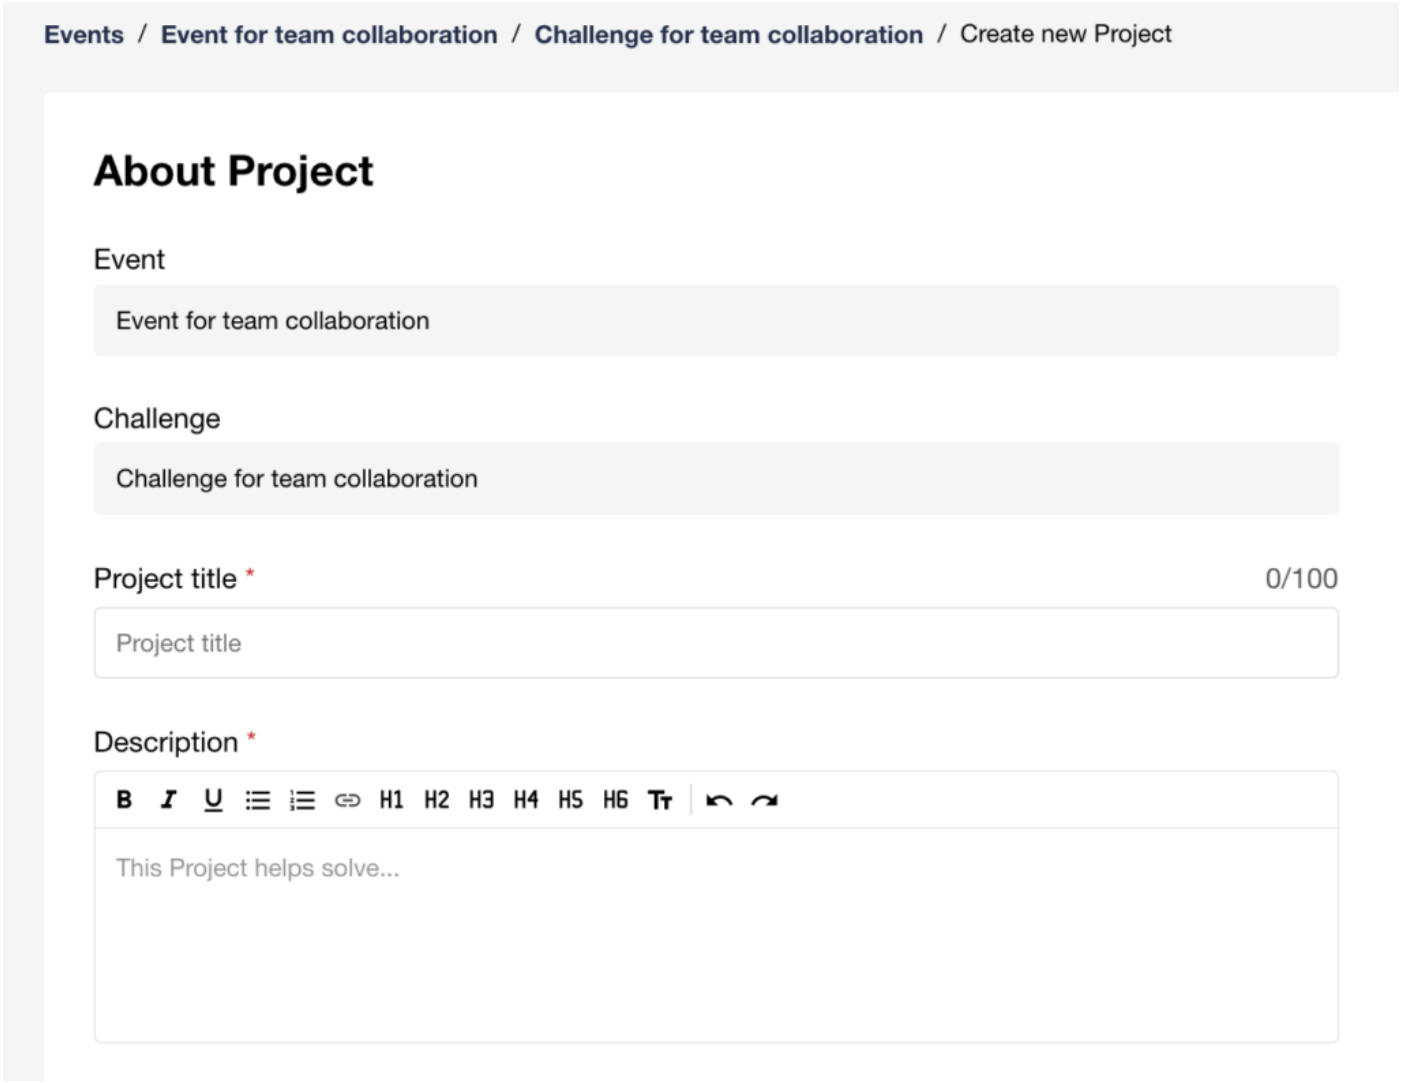

TechSprint Admins · https://nayaone.com/lou0lh9x2qkjngmo3lq4nz09dxorxnzcz51dpqp8/hackathon-admins-en/how-to-create-a-project/

When the challenge is created, the admins are able to create a project for team collaboration.

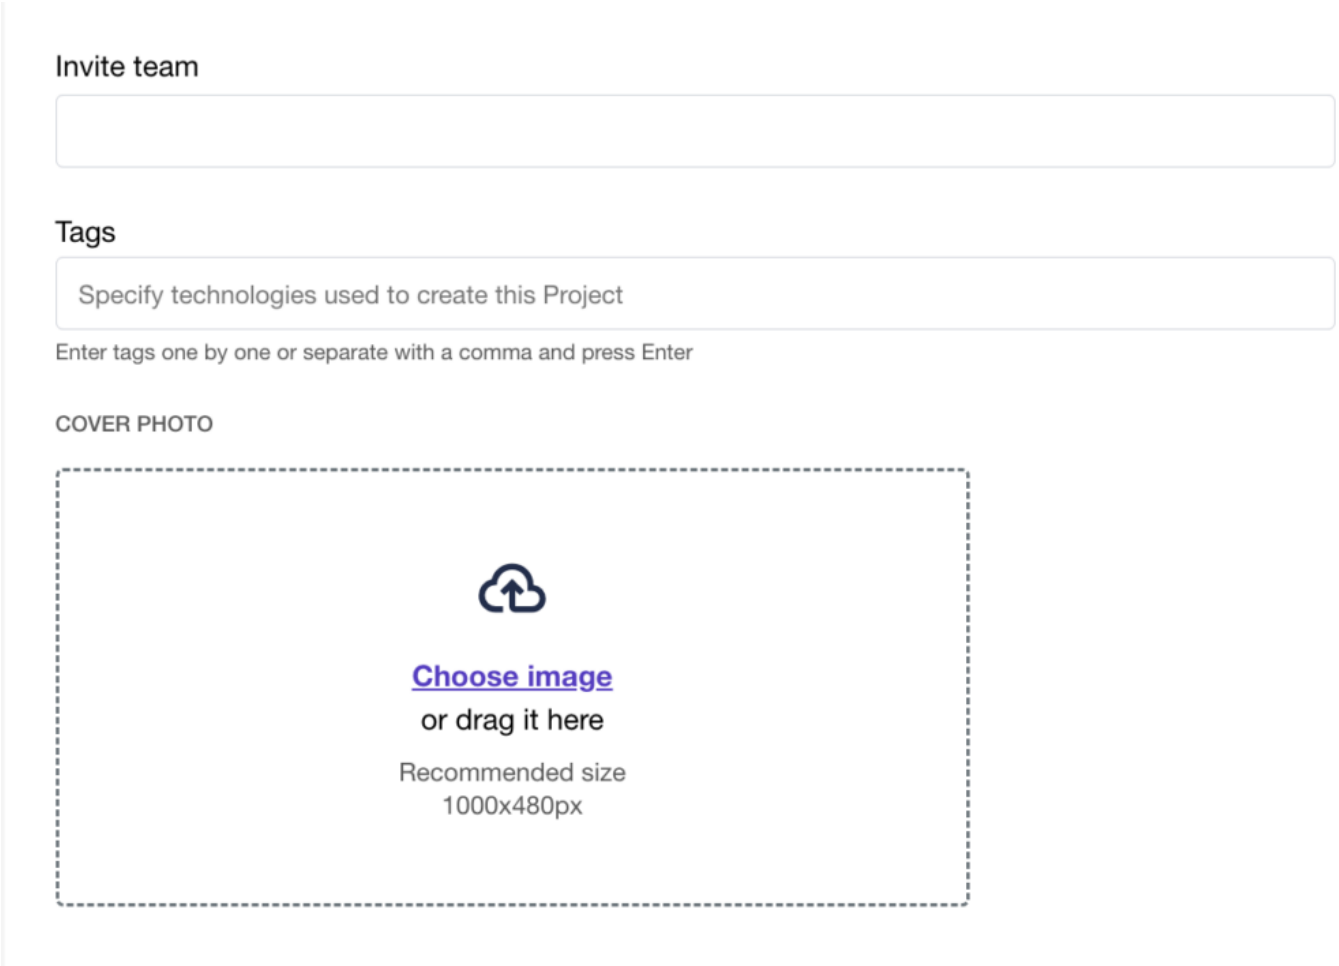

To create a project, open your challenge on the “Projects” tab and click on the “Add new Project” button

Fill in the title and description in the fields for your new project.

You can invite a user now or later after creating the project. Set the cover image and tags if you want to use it in your project.

After all required settings are chosen, click on the “Create Project” button to make your project live.
