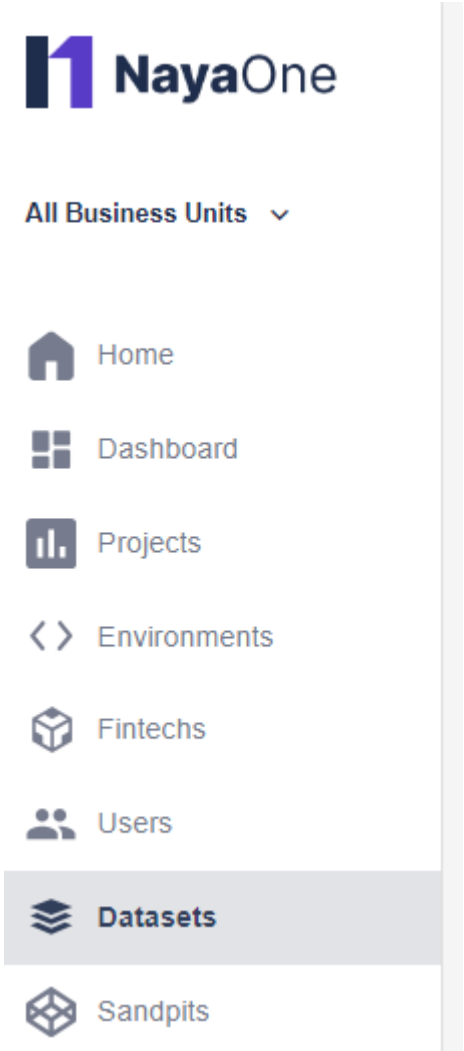
How to add a Dataset

Using Data · https://nayaone.com/lou0lh9x2qkjngmo3lq4nz09dxorxnzcz51dpqp8/datasets-for-users-en/how-add-dataset/

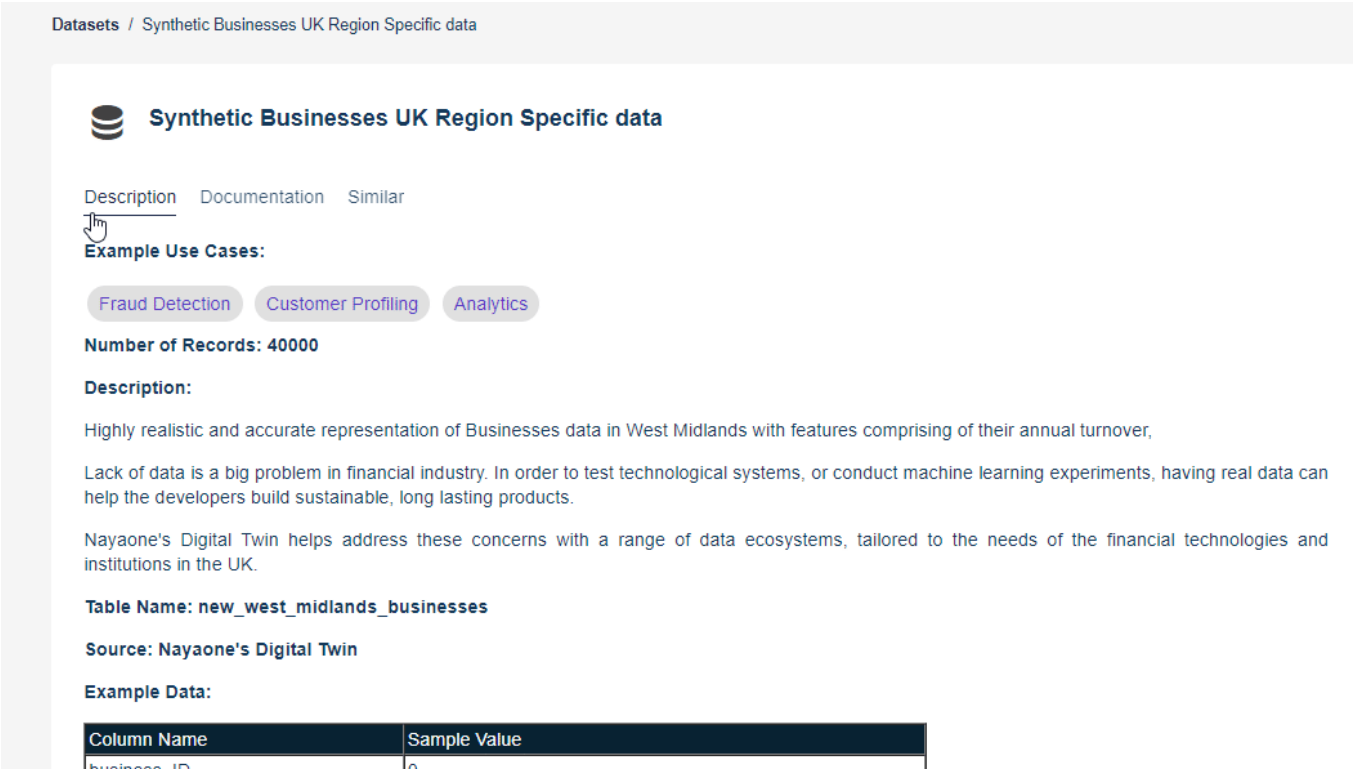
You can add Datasets when creating a Project, and when a Project is running.

How to add a Dataset before a Project starts

1. Click **Datasets**:



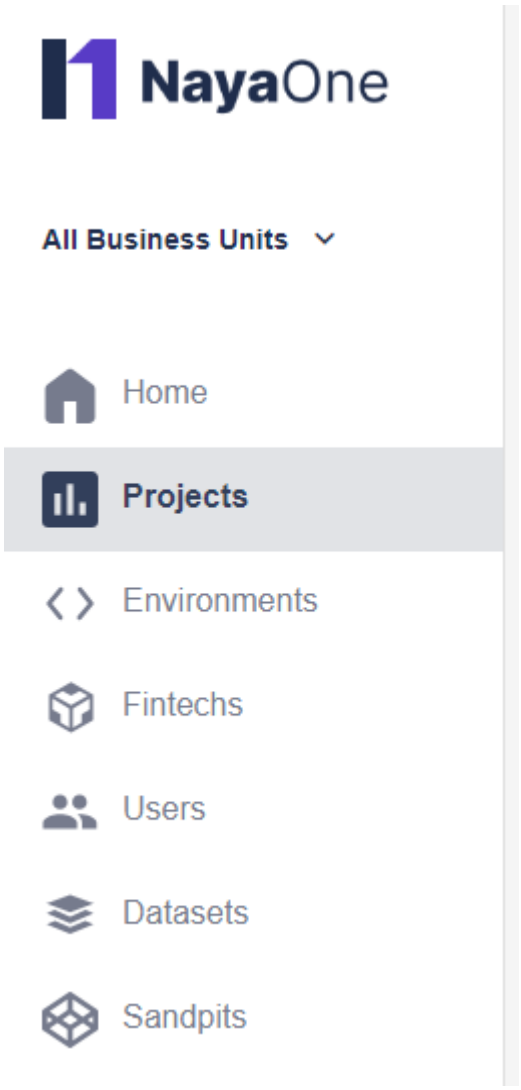
2. You can view the Datasets, each with a short **summary** and tagged with the **use cases**
3. Click a Dataset to explore more details
4. Click a tab to read the **description**, view documentation, and find **similar** Datasets:



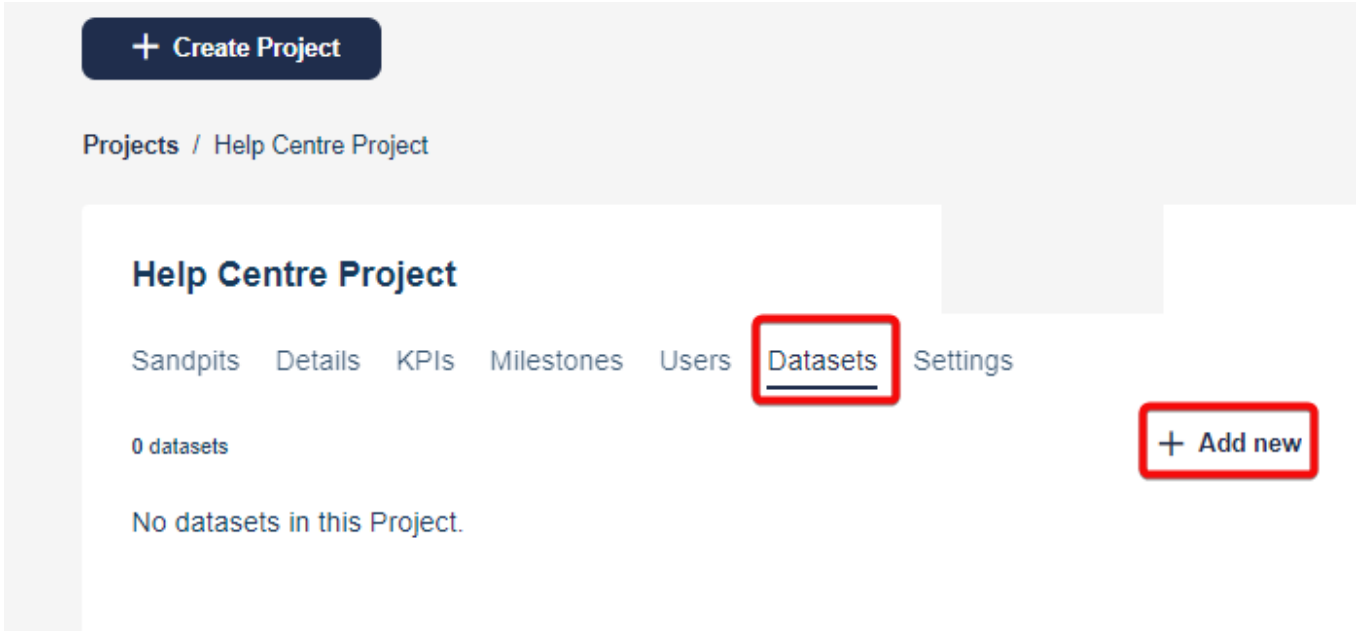
5. When you've made your choice, you can propose a project

How to add a Dataset when a Project is running

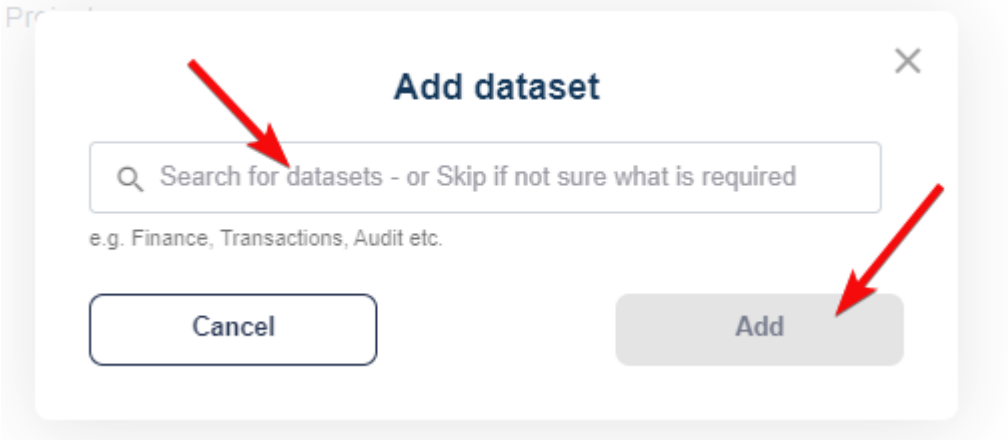
1. Click **Projects** and click the Project where you want to add a Dataset:



2. Click the **Datasets tab > +Add new**:



3. Search for the Dataset and click **Add**:



4. Your selected Dataset now appears under the Datasets tab
