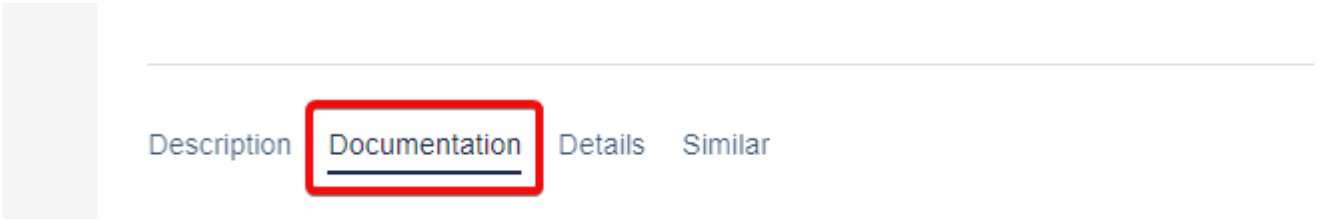
How to make requests to Fintechs

Working with Fintechs · https://nayaone.com/lou0lh9x2qkjngmo3lq4nz09dxorxnzcz51dpqp8/fintechs-for-dev/how-make-requests-fintechs/

Where to find code snippets, plus example endpoint requests.

Each Fintech on NayaOne has a **unique associated subdomain**. You'll find these within the Fintech's **Documentation** tab:



Code snippets can be copied in order to test each Fintech out from the same documentation tab.

The endpoints of the requests are: `<fintech>.nayaone.com/<request-path>`

Example request:

```
curl -i -X GET https://transferwise.nayaone.com/v1/rates -h "sandpit-key: <your-key>"
```
