How to test & compare multiple Fintechs

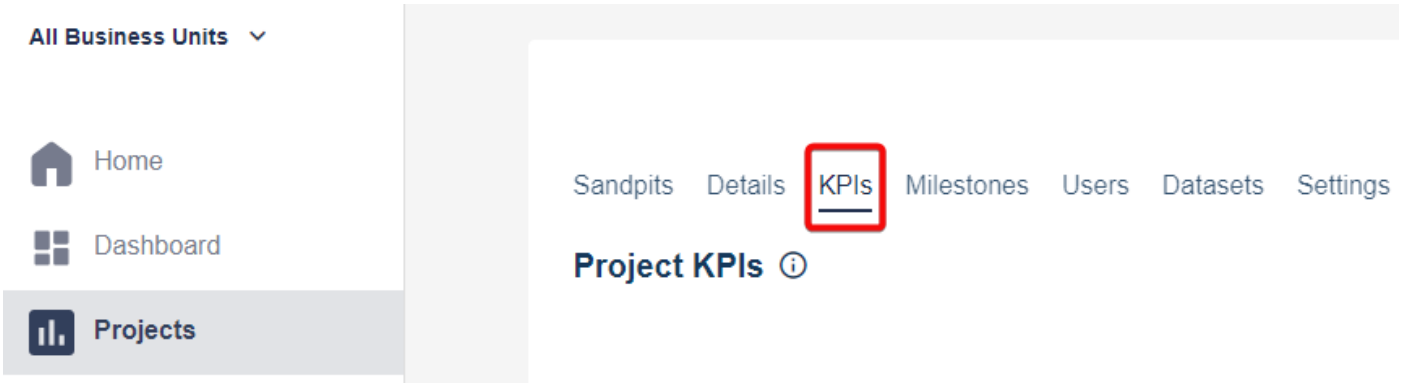
Working with Fintechs · https://nayaone.com/lou0lh9x2qkjngmo3lq4nz09dxorxnzcz51dpqp8/fintechs-for-users-en/how-test-compare-multiple-fintechs/

You can create a Sandpit for each vendor.

Creating a Sandpit for each vendor lets you compare performances and KPIs in one place.

You can create Sandpits when proposing a project, or when a project is under way.

Then you can open the Project and click the **KPIs tab**:



You can then scroll horizontally to click each Fintech tab to view its KPIs:

Sandpits Details KPIs Milestones Users Datasets Settings
