How to add a SaaS Sandpit

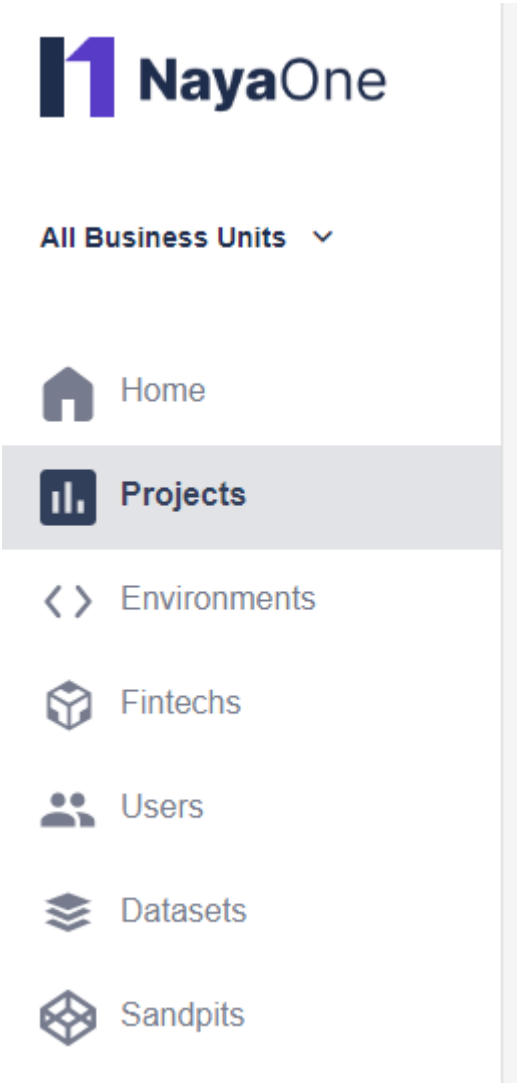
Configuring your Sandpits · https://nayaone.com/lou0lh9x2qkjngmo3lq4nz09dxorxnzcz51dpqp8/sandpits-for-dev-en/how-add-saas-sandpit/

How to set up, configure and launch your SaaS Sandpit.

This article is for adding a Sandpit to an existing Project. It's a different process if you're proposing a Project.

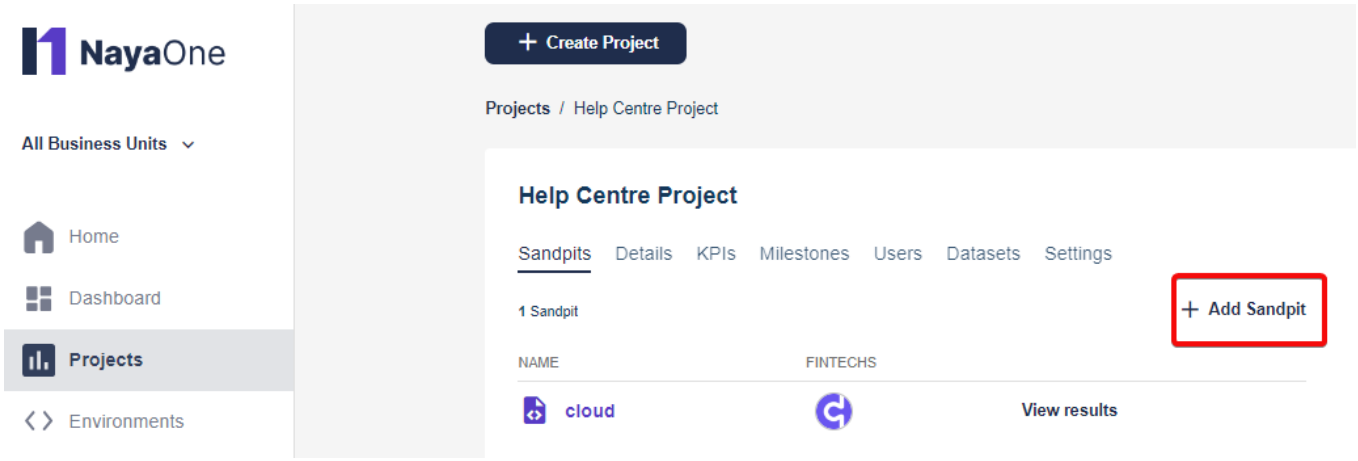
How to add a SaaS Sandpit

1. Click **Projects** in the sidebar:

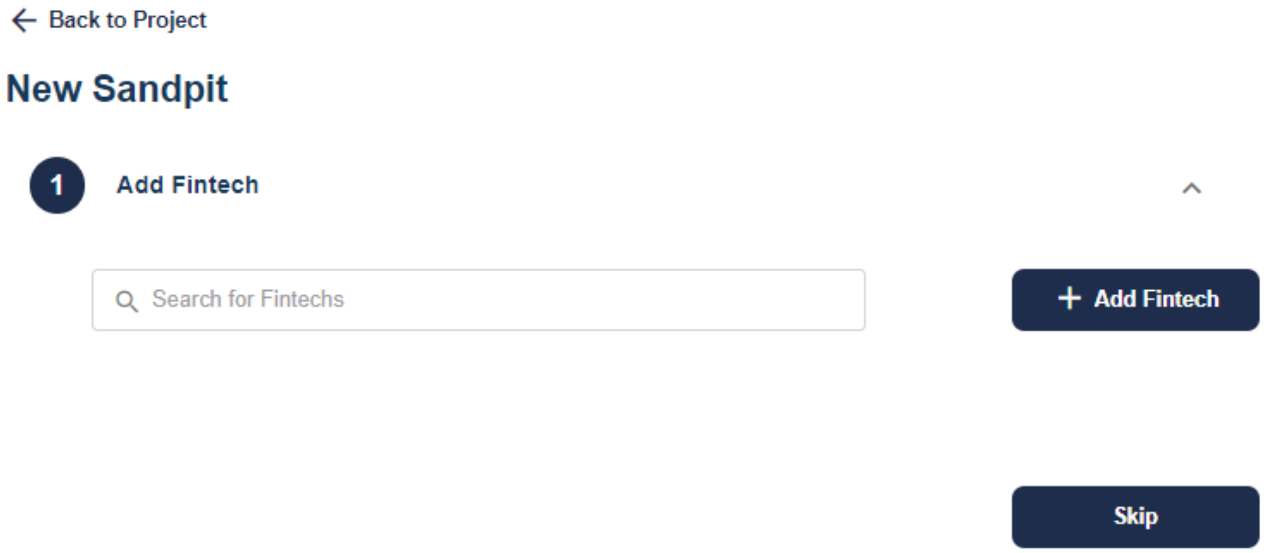


2. Click to open the **Project** where you want to add a Sandpit

3. Click **+Add Sandpit**:

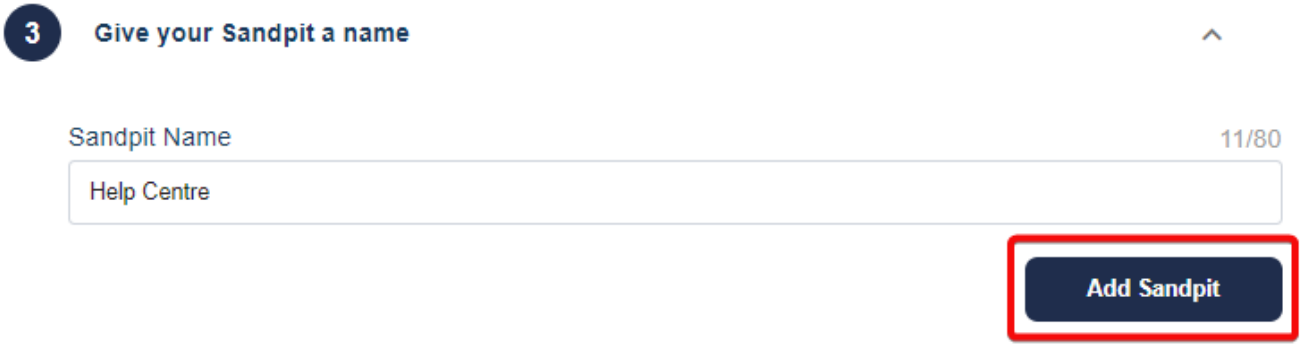


4. Add the Fintech for the Sandpit (or click **Skip** if you haven't chosen the Fintech):

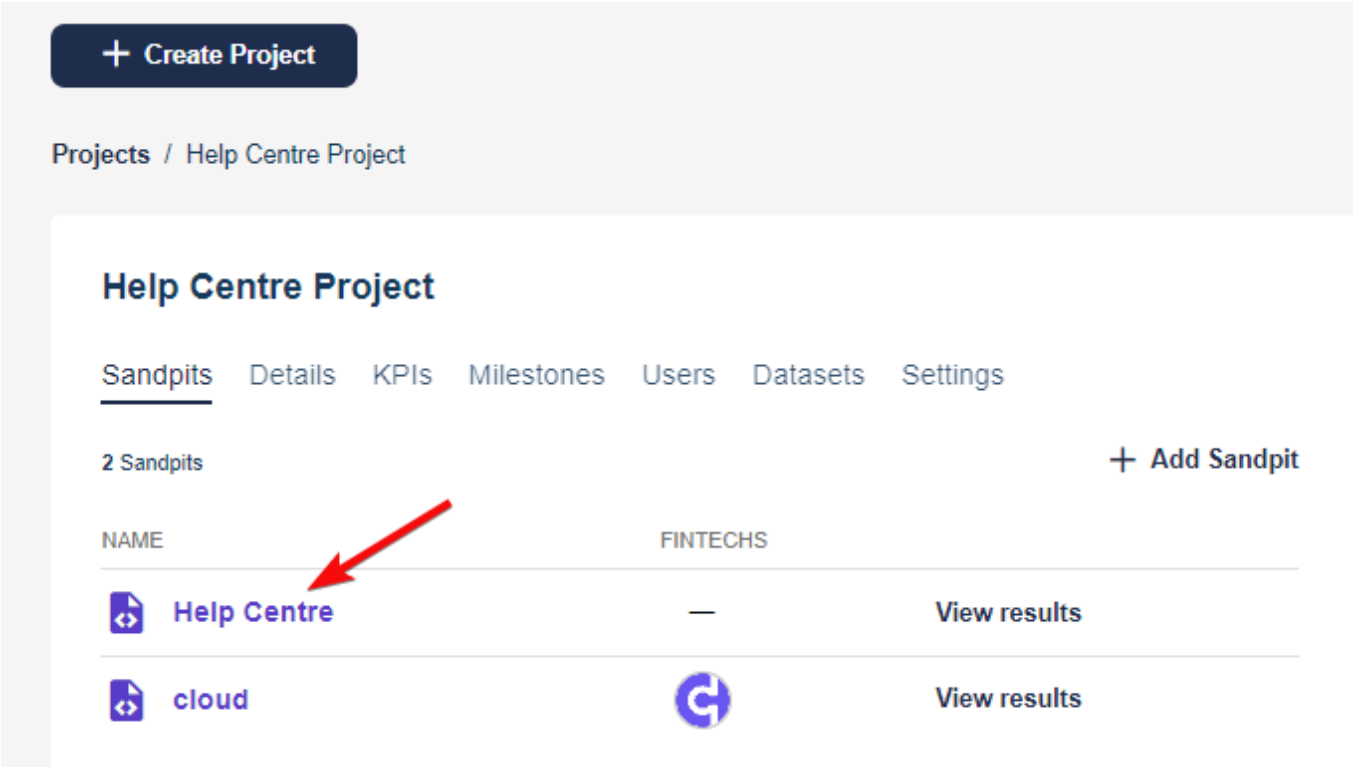


5. Click **Choose Sandpit type**, select **SaaS Sandpit**, click **Next**:

6. Enter a Sandpit **name** and click **Add Sandpit**:

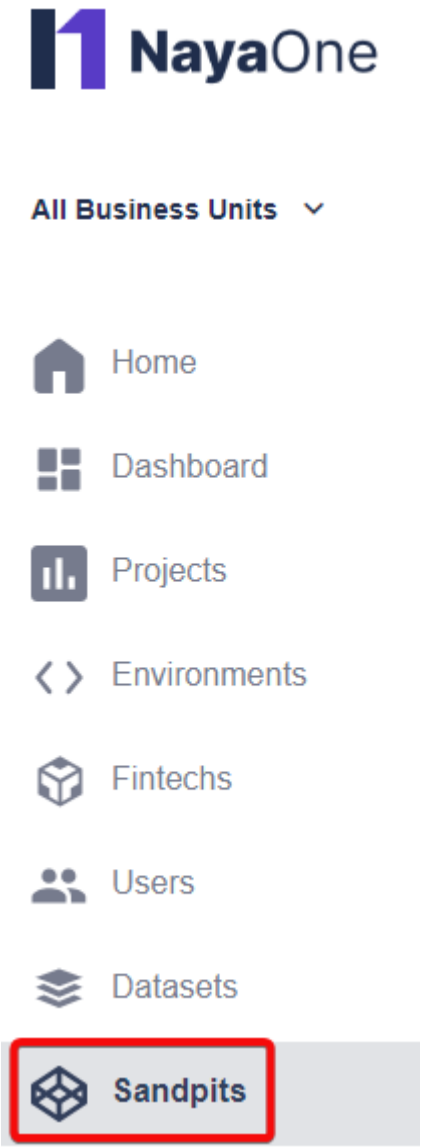


7. The SaaS Sandpit now appears in your Sandpit **list**:

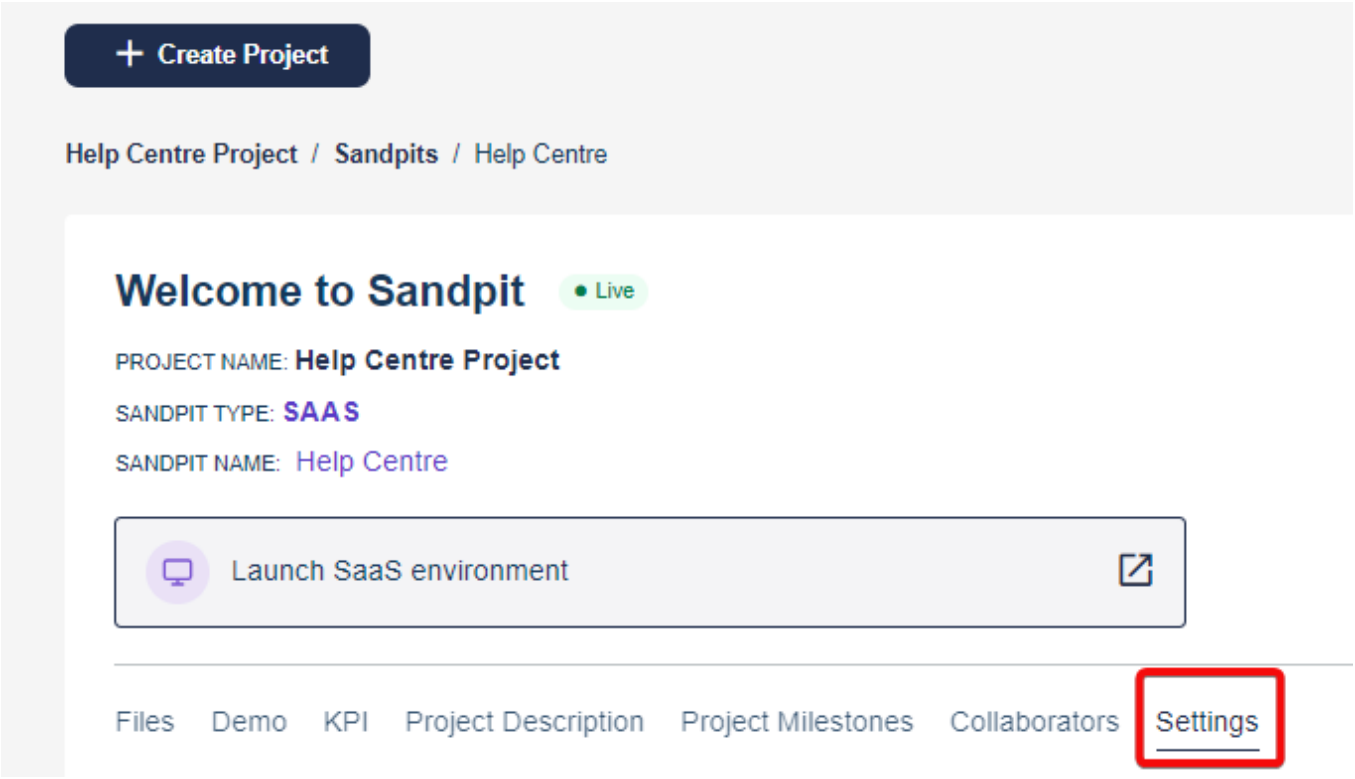


How to configure a SaaS Sandpit

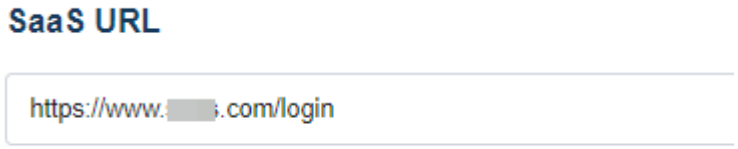
1. Click **Sandpits**:



2. Click the Sandpit you've created
3. Click **Settings**:



4. Add the **SaaS login URL** with the full **protocol**, such as https://www.

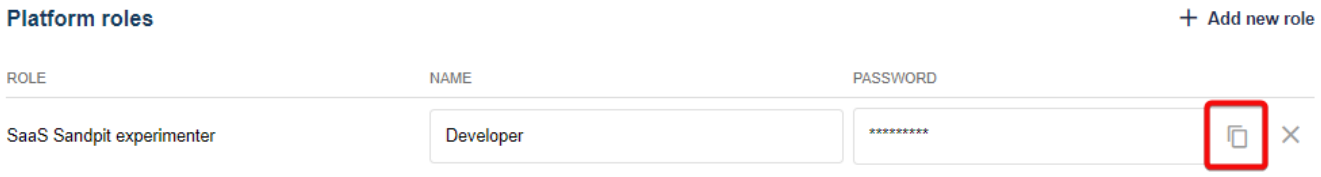


5. Click **+Add new role**:

6. Add **roles** and **logins** for people using your Sandpit

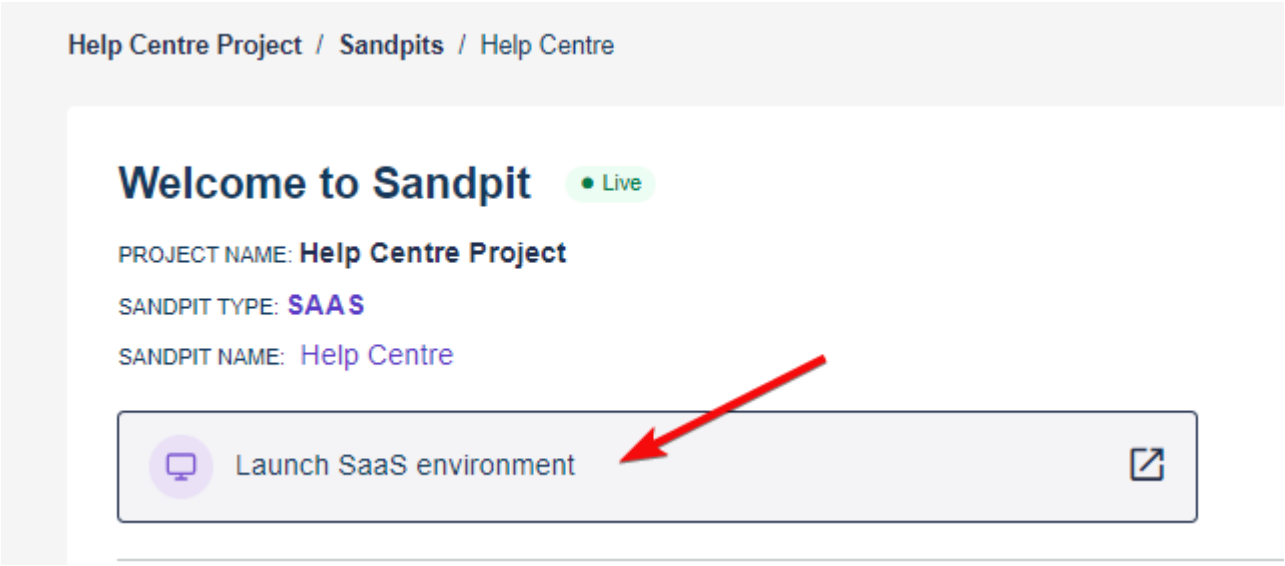
   Login credentials get shared with the SaaS, so passwords work when launching the Sandpit

7. Click to **copy** their password if you want to store the details:



How to launch a SaaS Sandpit

1. Open the Sandpit you've created
2. Click **Launch SaaS environment**:



3. **Login** using the credentials created when you configured the Sandpit (Step 5 of configuring):
