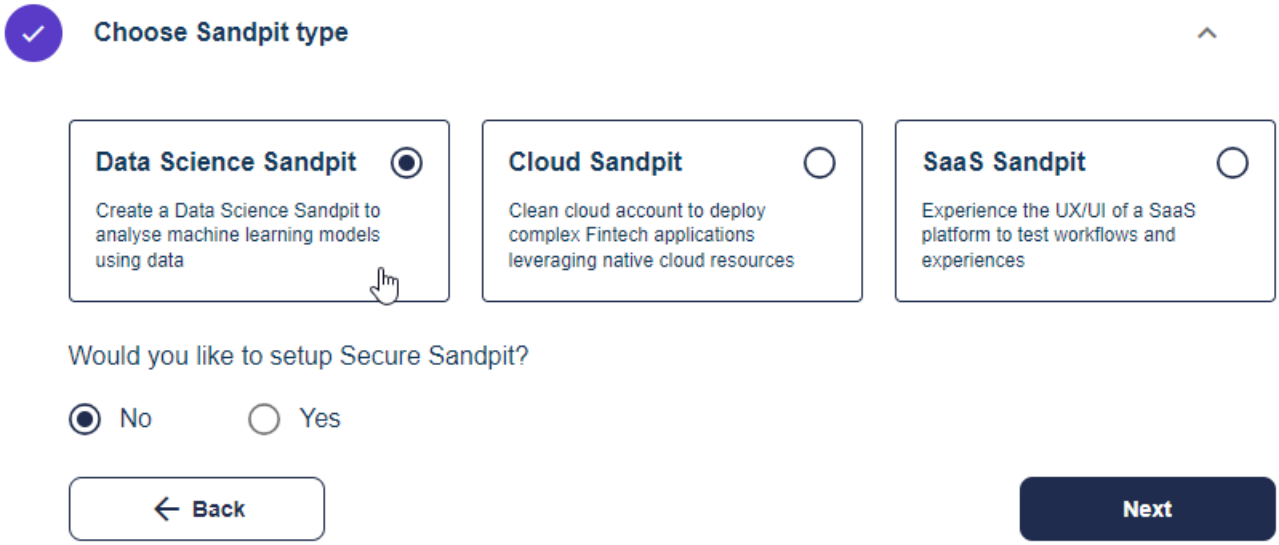
Secure Sandpits: Overview

Configuring your Sandpits · https://nayaone.com/lou0lh9x2qkjngmo3lq4nz09dxorxnzcz51dpqp8/sandpits-for-dev-en/secure-sandpits-overview/

Explore the security that's available.

When creating or editing a Project's Sandpit you'll see the option to set up a **Secure Sandpit**:



Secure Sandpit access levels & use cases

These are set at tenant level. View Sandpit control types

Data Science Sandpit (Jupyter Notebook)	**Cloud Sandpit** (AWS console)	**SaaS Sandpit**
Access Not available from the Jupyter notebook – access from the air-gapped environment **Use cases** Machine learning data analysis	**Access** Can only deploy resources that can't access the internet **Use cases** Analysis of highly sensitive data	n/a
